Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 3 is rejected under 35 U.S.C. 112 first paragraph for failing to be enabled by a specification such that one of ordinary skill in the art could make and use the invention.

In claim 3, the examiner cannot locate support in the specification for "the step of judging that a search through a given interval of PN sequences conducted on acquisition of pilot signals has ended in order to detect the unsuccessful registration at first attempt". The closest which could be found was on page 10 of the specification, last paragraph, but no mention of PN sequences is made there.

4. Claims 1 – 11 are rejected under 35 U.S.C. 112 second paragraph for failing to particularly point out and distinctly claim the subject matter which the applicant regards as their invention.

In claim 1, lines 12 – 13 and the corresponding locations in claims 8 and 11, it is stated "resuming registration processing under predetermined conditions when the pause ends".

Without reading limitations from the specification into the claims, the examiner believes that there is a problem with this language which almost shades into a 112 first paragraph problem, in view of the fact that on page 12 line 15, it is stated that (the predetermined condition is) having the sleep timer 34 time out. If this is so, then the act of "resuming registration processing (when the sleep timer 34 times out) when the pause ends" is indefinite for obvious reasons.

5. Claims 1 – 11 are currently allowable over the prior art, and would be allowed if the 112 first and second paragraph rejections mentioned above were corrected.
